

Zoomer Combi

A post-emergence non selective herbicide for the control of many broad leaved weeds and grasses in field crops, orchards and coffee plantations

ADAMA

Zoomer Combi displays an excellent efficacy on a wide range of broad leaved weeds and grasses due to combination of 2 Molecules with 2 different modes of action (Systematic and Contact activity)

Symptoms on the controlled weeds

Symptoms are first noticeable at the growing point of the plant - leaves turn yellow, followed by browning.

First symptoms appear quite fast:

- 2- 4 days for annual weeds (both Grasses & BLW's)
- 3- 7 days for perennial weeds (Cyanodon & Saccharum)
- Complete Kill happens in 7 to 14 days

Benefits for the farmer:

High efficacy

Controls a big variety of weeds that compete with your crop

Good stand alone product for the control of many weeds

No need to use several herbicides

Highly effective on tough broad leaved weeds

A cost effective solution to clean your field from those weeds

No effective residues

No restrictions with your following crop

A product with 2 different actives

A powerful tool to counter resistance development

Minimal Environmental impact

Allows you to keep your surrounds with no damage to the environment

One shot solution and peace of mind

Directions for use:

Half fill the tank with water.

Add the required amount of Zoomer Combi and water in a separate container and mix well until the mixture is thoroughly uniform.

Add the mixture to the tank and add water to the required amount as the agitator is running.
