

# Azimut<sup>®</sup>

An exceptional systemic and translaminar fungicide  
for the control of yellow rust and stem rust in wheat

ADAMA

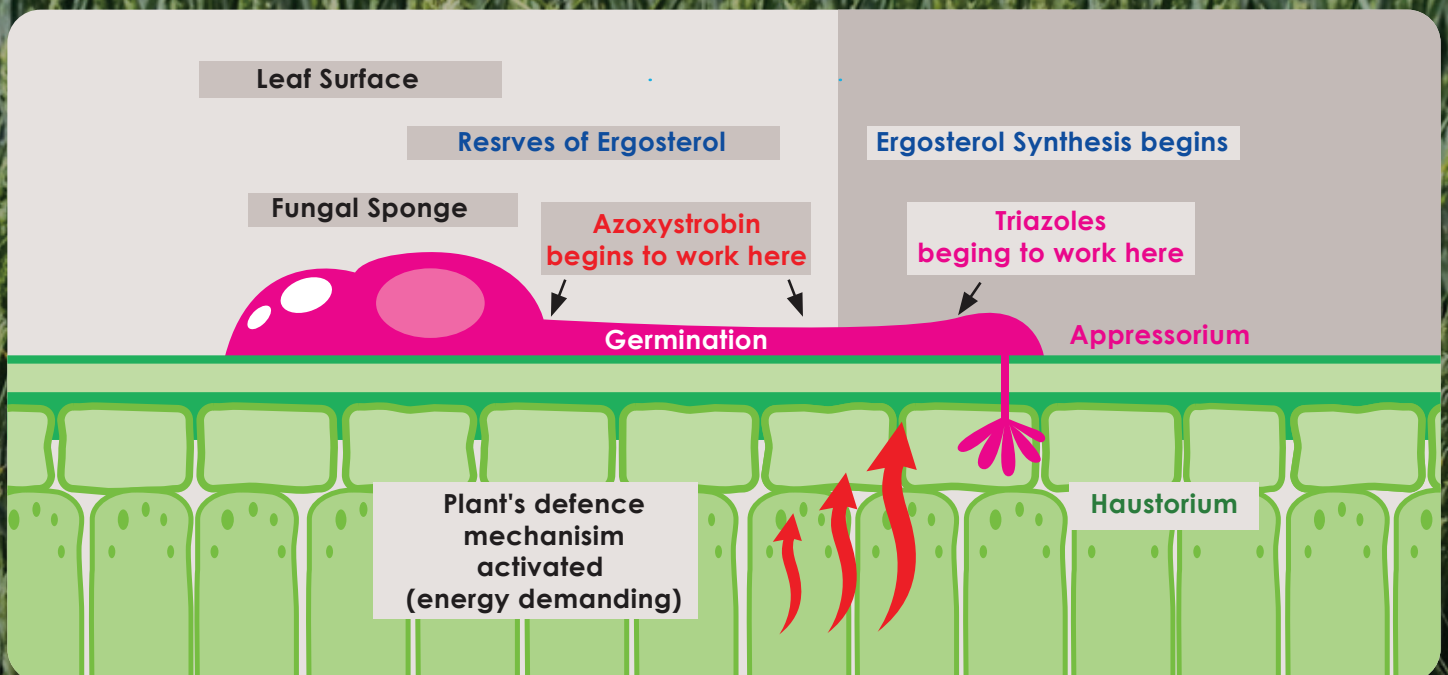

# Azimut®

Best disease control, resistance management and yield increase with the best fungicide combination in the market.

Azimut® targets Yellow and Stem Rust:

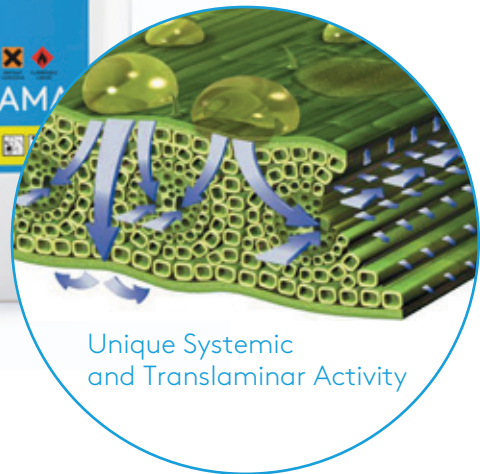

2 different modes of action help to prevent the development of fungal pathogens resistance:

Tebuconazole

Azoxystrobin

Unique Systemic and Translaminar Activity

## Benefits for the farmer:

Broad spectrum - Single application controls multiple diseases

Preventive, Curative and Eradicated Action - Broader window of application

Long duration of residual control - Reduced Number of sprays

**1+1**

Two different Modes of Action - Good Resistance Management

Unique systemic and Translaminar activity - Protects the new growth after spraying

Penetrates quickly into the leaf tissue - Reaches fast to the target site and enables early protection

Yield Enhancement & Quality of produce - Better price and revenue

## DIRECTIONS FOR USE:

Mix with water at the recommended rates and foliar apply on wheat.

Do not apply when dew is present or at dough growth stage.

Do not exceed 2 applications per season.

## MODE OF ACTION:

AZIMUT contains tebuconazole that disrupts normal cell functions and Azoxystrobin that inhibits spore germination and mycelia growth.

## MIXING AND TIMING OF APPLICATION
