

ADAMA-STK Agreement on TIMOREX GOLD® & STK REGEV® 'Hybrid' Fungicides for Colombia

TEL AVIV, ISRAEL, March 11, 2019 – Leading global crop protection company ADAMA Ltd. (SZSE 000553), and STK bio-ag technologies, the innovative Israel-based leader in botanical and hybrid technologies for sustainable agriculture and aquaculture, have signed an exclusive agreement for the distribution of TIMOREX GOLD® botanical-based bio-fungicide and STK REGEV® 'Hybrid' fungicide throughout Colombia.

In Colombia, TIMOREX GOLD® is approved for the following crops: Bananas, Rice, Ornamentals, Tomatoes, Avocados, Onions, Coffee, Corn, Tobacco, Potatoes, Passion fruit and pitahaya. Colombia has also approved STK REGEV® on rice, with expected label extension on bananas, ornamentals, coffee and tomatoes.

Commenting on the agreement, **STK CEO, Arye Tenenbaum** said, "We are very pleased to be partnering with such a great company as ADAMA, whose world-class team of experts will promote the use of these exceptionally innovative and highly-effective biological products to Colombian growers."

ADAMA Andean Countries CEO, Edgardo Iglesias commented, "TIMOREX GOLD® and STK REGEV® complement ADAMA's portfolio in Colombia. With these highly-advanced technologies, we aim to continue providing valuable services and products to enable farmers to optimize yields and help them grow."

STK Colombia Country Manager, Jose A. Estevez added, "I have great expectations for this strategic agreement to accelerate the STK market penetration and sales growth in Colombia."

About ADAMA

ADAMA Ltd. is one of the world's leading crop protection companies. We strive to Create Simplicity in Agriculture – offering farmers effective products and services that simplify their lives and help them grow. With one of the most comprehensive and diversified portfolios of differentiated, quality products, our 6,600-strong team reaches farmers in over 100 countries, providing them with solutions to control weeds, insects and disease, and improve their yields. For more information, visit us at www.ADAMA.com and follow us on Twitter® at [@ADAMAAgri](https://twitter.com/ADAMAAgri).

About STK

Founded in 1994, STK is a bio-ag technology company committed to sustainable crop protection through the use of innovative biological products. STK's botanical-based solutions (BBS), a synergy of cutting-edge scientific research and technology, enhance the safety, yield and quality of multiple crops. STK helps growers, food companies and supermarkets deliver healthier and safer food to market. STK's botanical and hybrid solutions are easily integrated into conventional spraying programs, helping to advance the Integrated Pest Management approach to food production. About TIMOREX GOLD®

TIMOREX GOLD® is a highly effective and popular botanical-based bio-fungicide. Based on Tea Tree Oil, TIMOREX GOLD® is used by growers in nearly 40 countries throughout the Americas, Asia, Australia/New Zealand and Israel. TIMOREX GOLD® protects fruits and vegetables from a wide variety of diseases, substantially increases crop yields and quality, leaves no chemical residues, and makes TIMOREX GOLD® treated crops more competitive and agriculture more sustainable.

About STKREGEV®

STK REGEV® is the world's first 'hybrid' fungicide. It is used successfully in many countries and several regions of the world. A ready to use mix, STKREGEV® is used exactly as other fungicides, but with the added benefits of reduced chemical residues and much better resistance management due to its highly complex formulation of Tea Tree Oil and Difenconazole. This easy to use fungicide serves as a 'bridge,' enabling farmers who have never used any biological product to try one, without having to mix, rotate or do anything differently, thereby expanding the use of biological products for sustainable agriculture.
