Presents

**Pedestal<sup>®</sup>**

**Effective kill... Possible only with Pedestal...**

## Pedestal®

Novaluron 10% EC

- ▶ **Pedestal**, based on the active ingredient novaluron, is a novel insecticide belongs to the benzoylphenylurea group.
- ▶ **Pedestal** active against larvae of insects of the orders lepidoptera, coleopteran, homoptera and diptera. It acts by inhibiting chitin formation during moulting.
- ▶ **Pedestal** acts mainly by ingestion, but has shown some contact activity. It does not have ovicidal activity, but a high percentage of mortality of first instar hatching from eggs laid on sprayed foliage occurs. It also suppresses fecundity.
- ▶ **Pedestal** was found safe to major beneficial insects and may be used as a component in integrated pest management (IPM). In India, it was found to be the best product for *spodoptera* control in many corps.

**Available Pack sizes:** 50ml, 100ml, 250ml, 500ml, 1ltr

**Antidote:**

There is no specific antidote. Treat symptomatically and give supportive therapy.

### Recommendation for use:

Crop	Insect pest	Dosage	
		ml/Hectare	ml/Acre
