

Proximain®

Propineb 70% WP

- ▶ **Proximain** is a contact fungicide with broad spectrum activity against various disease of rice, chilli, grapes, potato and other vegetables and fruits.
- ▶ **Proximain** interferes at different locations in the metabolism of fungi. As a result this product is particularly suited in spraying programmes to combat and prevent the selection of resistant population of fungal pathogen.
- ▶ **Proximain** is extremely low in toxicity and ideally suited for IPM programmes.
