SORATEL®

OILSEED RAPE

SORATEL® is a unique, high performing prothioconazole, formulated using Asorbital formulation technology to ensure strong activity against Sclerotinia and Alternaria in oilseed rape.

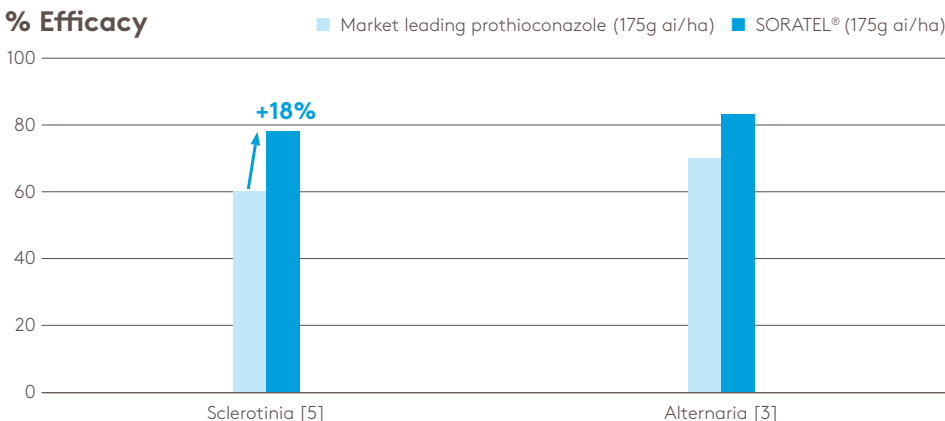

Key Benefits

- SORATEL® is formulated using **Asorbital formulation** technology, including a built-in adjuvant and special solvent system.
- A fully optimised formulation improving uptake into the leaf, creating excellent systemic activity within the plant and increased rainfastness.
- Superior disease control compared to leading prothioconazole.
- Consistent and reliable under a range of conditions.

Crop Information

Crops	Max individual dose (L/ha)	Max total dose (L/ha)	Latest time of application
Winter oilseed rape	0.7	1.4	Full flowering (BBCH 65) (PHI 56 days)

Improved Disease Control in Oilseed Rape

Maritime trials, 1 application (flowering), assessment at ripening, disease levels 8-19%, [] = number of trials

Product Information

Active ingredients:
250g/L prothioconazole

Formulation:
Emulsifiable Concentrate

Pack size: 5 litres

Application Information

Water volume: 100-300L/ha

Spray quality: Medium

LERAP: B

- In European trials, SORATEL® consistently provided a notable improvement in disease control under a range of conditions compared to the current market leading prothioconazole product.
- Specifically, under Maritime conditions, trials have shown that SORATEL® is up to 18% more efficacious against Sclerotinia than the current market leader.
