Batch No.	Date of Manuf:	Expiry date:
EPA Registration N°:		

DIRECTIONS FOR USE: See Table for details.

Crops/sites	Major pests	Dosages	Methods of application
Lawns, legumes, ornamentals, vegetables, pineapple	Crickets, defoliators, mealybugs, aphids, ants, termites, other soil-borne pests, leaf miners	40-70 ml/15L of water	Lawns: Use 400 ml of solution per m ² . Water lawn thereafter. Ornamentals: Spray to drip. Pineapple: Dip sucker in solution before planting. Drench base thereafter.
Soil treatment	Crickets, termites, ants, other soil-borne pests	80 ml/15L of water	Drench soil for 5-7 days prior to planting. Repeat when necessary.
Wood preservation	Termites, wood borers	60-80 ml/15L of water	Brush or spray to drip every surface of sawn timber and leave to dry.
Protection of buildings in termite endemic areas	Termites	60-80 ml/15L of water	Dig shallowly along walls. Drench furrow with solution and cover. Repeat as necessary.

Mixing: Fill spray tank half way with water. Pre-mix required Pyrinex-quick. Pour mixture into spray tank and agitate sprayer. Fill tank with water to the required level. **Usage:** Apply Pyrinex-quick when pests are noticed. Agitate sprayer before spraying and every 5 minutes during course of spraying.

Pre-harvest interval: 14 days

WHO Toxicity Class: II (Moderately toxic)
